**You have** got to come now. **We have** found a huge footprint. **It has** got three claws but they **are not** very long. The toes **have not** been damaged but we think **we have** spotted a scar across the pad. **We would** guess **it has** been injured in the past but **we are** sure **you will** be able to tell us a lot more when **you have** seen it yourself.

See you soon
